

THANAY GEESHPATHY NARAYANAMURTHY

gnm.thanay@umassd.edu | (774)-365-7907 | Dartmouth, MA | [Linkedin](#) | [Portfolio](#)

EDUCATION

University of Massachusetts Dartmouth, *Dartmouth, MA – USA*
Master of Science (MS) – Data Science | **GPA: 4.0**

September 2022 - May 2024

Dayananda Sagar College of Engineering, *Bengaluru, KA – India*
Bachelor of Engineering (BE) – Electronics and Communication (ECE)

August 2014 - Jan 2019

PROFESSIONAL EXPERIENCE

Data Engineer | INDEGENE

Jan 2022 - Aug 2022

Bengaluru, KA - India

- Analyzed **EHR** and **pharmacy claims data** for 100+ patients to understand drug effectiveness.
- Used **Python**, **SQL**, and **Tableau visualizations** to optimize sales data delivery by 33% on **Dataiku** and **Snowflake**.
- Developed **Tableau** dashboards to aid sales in targeting HCP writers, boosting sales by 6%.
- Enhanced content origination **ETL pipelines**, increasing content volume by 18%.
- Automated data sourcing to **AWS S3** and **Athena**, reducing process time by 10% with **Airflow**.
- Built sales **prediction models** for a \$60M acquisition in eye care products.

Associate Product Manager | FINFLUX

Jul 2021 - Dec 2021

Bengaluru, KA - India

- Led a team of 10 using **Agile** project management approach.
- Used **customer analytics** to cut change requests by 15%.
- Improved customer satisfaction by 25% by defining and tracking key metrics using **Metabase**.
- Streamlined internal communication and documentation, reduced employee training times by 50% using **Confluence**.
- Slashed monthly support requests by 30% on **Freshdesk**.

Data Engineer | FINFLUX

Feb 2019 - Jun 2021

Bengaluru, KA - India

- Engineered **Loan Management System** workflows, cutting costs by 14% for clients.
- Automated deployments with **Jenkins**, reducing maintenance by 5%.
- Optimized **MySQL** scripts, boosting backend performance by 25%.
- Automated **API** calls and data transformations with **Pentaho**, scaling loan services by 10x.
- Managed **AWS** infrastructure, **EC2**, **RDS** and **CloudWatch**, reducing downtimes by 15% and incident response times by 12%.
- Modeled **data warehouse** for 5% loan provisioning and delinquency management using **PostgreSQL** and **AWS Redshift**.

TECHNICAL SKILLS

Languages:

Python, R, C++

Cloud and Databases:

AWS – [DynamoDB, S3, Athena, RDS], MySQL, MongoDB, PostgreSQL, Cassandra, Neo4j, Snowflake

AI and Machine Learning:

PyTorch, Transformers, LLMs - finetuning and API integration, AWS – SageMaker, Pinecone, Langchain

Web and DevOps:

HTML5, CSS3, REST, d3.js – JavaScript, Flask, Django, AWS – EC2, Git, Kubernetes, Docker, Jenkins – CI/CD, Postman API

ETL and Visual Analytics:

Tableau, Power BI, AWS – [Redshift, Glue, EMR, Quicksight], Metabase, Dataiku-DSS, Pentaho Kettle, Kafka, Airflow

Others:

JIRA, Confluence, MS Excel, UNIX, Statistical Analysis, Hypothesis Testing, A/B Experimentation

ACADEMIC PROJECTS

Gravitational Wave parameter estimation using Neural Networks [Python, SVD, GPU Computing, Neural Networks]

- Parameter estimation using neural posterior estimation to make fast inferences.

Spotify Playlist Enhancer [Python, Machine Learning, Flask, HTML, CSS, Flask, Recommendation System]

- Created a webpage and **recommendation system** that takes a Spotify playlist link from user and generates up to 30 songs.

Face recognition using eigenfaces [Python, Machine Learning, Numpy, Pandas, MATLAB, OpenCV, CuPy, Numba, PCA]

- Built a facial recognition program using principal component analysis (PCA) dimensionality reduction.

Player Position Predictor [R, Machine Learning, KNN-clustering, LDA]

- Implemented ML models KNN-clustering and linear discriminant analysis (LDA) for a prediction with 90% accuracy.
